

8x16 Saltbox

Call toll-free: 1.866.297.3760

By far the most popular design the salt box begs the word traditional. This extremely versatile cottage has a very rugged Hemlock frame that will withstand the test of time. With 128 sq. ft. of usable space, this building easily lends itself to basic storage, a potting shed, parking for your outdoor toys or a combination of all three.

The salt box design originated in New England shortly after the pilgrims landed. The design most likely originated from a shed roof style. An overhang off the front was added for protection and style. It has proved to be a very aesthetically pleasing and practical design for snow country. Many rural farms can be spotted with homes and out buildings with roofs that shed the majority of snow off the back and out of the way.

All of our wood sheds, storage sheds, garden sheds, cottages and utility enclosures are built of the finest Vermont lumber and handcrafted for long life and durability. New England weather can really put a wood garden shed or cottage to the test, and Jamaica Cottage Shop's products have proven to stand the test of time and strength.
