

8x18 Heritage

Call toll-free: 1.866.297.3760

This design is one of my favorites. It is in response to the many who have asked for a multi purpose building that will keep both happy. It took a year and twelve revisions before this design was finalized. It makes very good use of the space while providing an aesthetically pleasing appearance. The 5' double doors on the gable end are adequate for a lawn tractor, ATV, and/or firewood storage. With the addition of a workbench and cabinet space, the interior 8x10 can easily be converted into a potting area or workshop.

An interior door set into the partition closes off the 8x10 storage area, while providing easy access between the two sides of the building. This design can be made into a living model and/or a different floor plan can set up for its intended use. Contact our client care team to learn how to make this design work for you.

All of our wood sheds, storage sheds, garden sheds, cottages and utility enclosures are built of the finest Vermont lumber and handcrafted for long life and durability. New England weather can really put a wood garden shed or cottage to the test, and Jamaica Cottage Shop's products have proven to stand the test of time.

Specifications:

Square Footage: 160 sq ft

Overall dimensions: 11'2" wide x 19'2" deep x 10'6" high
