

# 4x10 Woodbin

Call toll-free: 1.866.297.3760

Start the wood-burning season off right! Old timers here in Vermont say "get your wood stacked by Labor Day". The best way to cure firewood is to keep it dry and allow the air to pass through it. The Wood Bin design does just that, it is attractive and practical firewood storage.

A cord of firewood measures 4x4x8 or 128 cubic feet. The cottage is designed to hold a cord plus of wood. A partition sanctions off two feet of the floor space for kindling and a few hand tools. The separate compartment and wood storage area has a heavy 2x6 floor frame and is sheathed with 1" rough sawn barn board. The salt box roof will shed the majority of the snow off the back and out of the way.

Hand made in Vermont, from native rough sawn hemlock and pine lumber, the woodbin is ready to be stacked full. Rugged post and beam techniques passed down through the centuries are being applied to create a sturdy dry wood storage shed. It is built the same way they have been for centuries with native Vermont Lumber.

The pre-cut kit will be delivered curbside by common carrier. It is recommended to have helpers on hand to unload. Basic carpentry tools are required; the kit is geared to beginner carpentry skills. Technical support is provided via our toll free support line. Step by step plans may be purchased separately. Pictures of client-modified kits do not depict option A designs and may contain windows, doors, siding or hardware not included in the pre-cut kit.

Included in the kit: • All Fastening Hardware  
• Step-by-Step Plans

Jamaica Cottage Shop, Inc. engineered the plans for our designs to do-it-yourself homeowners. The detailed plans include foundation options, a shopping list, and a color coded cut list. The trigonometry of the roof triangles has all been simplified with tracing the cut out roof templates. The plans are set for full dimensional lumber and provide a clear step-by-step path.

**Complete Kit** \$2,102

The rough sawn native Vermont lumber package has all the pieces cut and ready for assembly. It includes a cut and notched hemlock post and beam frame and pre cut pine siding. The fasteners, hardware, windows, and doors are included as well as the step by step plans. The kit is geared to a do-it-yourself homeowner with beginner knowledge of carpentry.
