

6x8 Greenhouse

Call toll-free: 1.866.297.3760

There are many manufacturers that produce green houses. This one is an original design by JCS. A combination front door and 5 six light barn sash windows that are all hinged to open out it makes this design comfortable and easy to use. Additional windows one in the gable end and the other two on the side of the door allow extra light and enhance the charm of this little cottage. The roofing material is corrugated translucent fiberglass allowing the light to further penetrate, but not to overheat the building with direct sun light. There is no floor to worry about rotting away. We suggest it sit on a layer of brick or stone, gravel or directly on the ground. The cottage sits on a layer of pressure treated lumber and includes a complete wrap around shelf.

Hand made in Vermont, from native rough sawn hemlock and pine lumber, the pre-cut lumber package includes all fastening hardware, roofing, and step-by-step plans. Rugged post and beam techniques passed down through the centuries are applied to pre cut and notch this kit into a sturdy picturesque building reminiscent of old New England. Designed for the beginner to intermediate carpenter the kit pieces are color coded, part numbered and detailed in an exploded view.

- Included in the kit:
- All Fastening Hardware
 - Step by Step plans

Specifications:

- Square Footage:** 48 sq ft
- Overall dimensions:** 6' wide x 8' deep x 8' 6" high
- Recommended Foundation:** 3"-4" Crushed Gravel

Plans	\$50.00	Complete Kit	\$3,940
<p>Jamaica Cottage Shop, Inc. engineered the plans for our designs to do-it-yourself homeowners. The detailed plans include foundation options, a shopping list, and a color coded cut list. The trigonometry of the roof triangles has all been simplified with tracing the cut out roof templates. The plans are set for full dimensional lumber and provide a clear step-by-step path.</p>		<p>The rough sawn native Vermont lumber package has all the pieces cut and ready for assembly. It includes a cut and notched hemlock post and beam frame and pre cut pine siding. The fasteners, hardware, windows, and doors are included as well as the step by step plans. The kit is geared to a do-it-yourself homeowner with beginner knowledge of carpentry.</p>
